

Transition Program

Adult Pharmacy Providers:

As your young get older, you may need to transition from your pediatric pharmacy provider. Children's Mercy Outpatient Pharmacy does not fill prescriptions from providers outside of Children's Mercy. You will need to find a new pharmacy who provides services to adults.

- Ask your pediatric provider and pharmacist who they suggest. Talk with your current provider to see if you need to work with a compound pharmacy.
- Ask your family and friends for any suggestions.
- Review your health insurance plan for in-network adult pharmacy providers.
- Review Children's Mercy list of adult pharmacy providers.

Remember, you may need to contact more than one pharmacy before you find the best one for you. Once you find your new pharmacy, tell your current pharmacy provider. They will make sure all prescriptions are sent to the new provider.
